

QSP/QSD Training

April 28-30, 2021

In-Person class Limited to 15 attendees

Class Description:

The training is a two or a two and a half day course intended for all individuals working with construction and post-construction stormwater issues and those who intend to continue working in the State as Qualified SWPPP Developers (QSD) or Qualified SWPPP Practitioners (QSP).

This workshop focuses on the application of the California Statewide Construction General Permit (CGP), provides an overview of writing and implementing SWPPPs, site compliance, enforcement and submission of permit documentation to the State's data base— Stormwater Multi-Application and Report Tracking System (SMARTS). This class meets the requirements set forth by the California Construction General Permit Training Team (CCGPTT) and the California Storm Water Quality Association (CASQA).
